

VACCINE FACTS

VIRAL VECTOR (J&J) VACCINE

COVID-19 can cause severe illness and even death in all ages, but the vaccine can help!

The vaccine:

- Only 1 dose needed
- Tested on over 40,000 diverse people before being distributed
- Reviewed thoroughly and fully by health experts
- Thorough safety and efficacy protocols followed
- Impossible for vaccine to give you COVID-19

You are protected **14 days after dose** and vaccine is **93% effective** in preventing hospitalizations!

Side effects of the vaccine:

- Short-lived with full recovery
- Less than half of people have headache, fatigue, and/or muscle aches
- Serious reactions are rare (less than 1 in 100,000)

Medical staff are present in case of a rare allergic reaction.

MYTH-BUSTING

- No, the vaccine cannot give you COVID-19.
- No, the vaccine will not be forced on you.
- No, the vaccine does not have tracking chips in it.
- No, we do not have enough doses, yet, for everyone.
- No, it is not the only solution to end the pandemic.
- No, it will not change your DNA.

Get your COVID VACCINE as soon as you can to:

- Protect yourself and each other
- Help end the pandemic

Please continue to wear a mask and keep at least 6 feet of distance between you and others as often as you can.
