

VACCINE FACTS

MRNA COVID VACCINE

COVID-19 can cause severe illness and even death in all ages, but the vaccine can help!

The vaccine:

- Tested on 70,000 diverse people before being distributed.
- Reviewed thoroughly and fully by health experts.
- Thorough safety and efficacy protocols followed.
- Impossible for vaccine to give you COVID-19.

Protection starts **10 DAYS AFTER FIRST DOSE** and is **95% EFFECTIVE AFTER TWO DOSES!**

Side effects of the vaccine:

- Short-lived with full recovery
- Include fatigue and aches (in about 50% of people) and/or fever and chills (in about 15 – 30% of people)
- Serious reactions are rare (less than 1 in 100,000)

Medical staff are present in case of a rare allergic reaction.

MYTH-BUSTING

- No, the vaccine cannot give you COVID-19.
- No, the vaccine won't be forced on people by the government.
- No, mRNA vaccines cannot change your DNA.
- No, the vaccine does not have tracking chips in it.
- No, we don't have enough doses, yet, for everyone.
- No, it isn't the only solution to end the pandemic.

Get your COVID VACCINE as soon as you can to:

- Protect yourself and each other
- Help end the pandemic

Remember to get your second dose!

Please continue to wear a mask and keep at least 6 feet of distance between you and others as often as you can.
