This ongoing series is brought to you by a partnership between AmeriCares and ECHO-Chicago at the University of Chicago. This collaboration puts primary care providers in the safety net sector in direct contact with a panel of experts who will explore relevant topics concerning post-COVID conditions and provide knowledge and tools to effectively identify, diagnose, and manage these conditions in patients.

AmeriCares saves lives and improves health for people affected by poverty or disaster so they can reach their full potential.

Supported by a grant from Pfizer Inc.
